Dear Harold,

Legacy of Doubt is libelous yet dull and often stupid, dishonest at worse.

"Oswald ----- killed Kennedy. There was no deceit in The Warren Report." Ferrie was "involved. Thus, Garrison and The W.C. make contact! Mayer attacks Garrison only to obscure the fact that both use the same cast, albeit in different roles. Oswald, Mafia hit man! Of course, Mayer can produce only one Mafia link to L.H.O.- Ferrie. The only evidence against Brading.

He was near the assassination site. So make "others".

He gave the police a false name. If he didn't his pseudo could be revoked for being with Jones, an ex-con.

He was in the same building as Jack Ruby. This is the one possible point of interest. Yet it leads

toward an Oil Conspiracy.

Mayer alleges that R.F.K. was investigating J.F.K.'s death. He quotes a source who does "not wish to be named". How convenient!

Much of the data comes from Oswald in New Orleans although Mayer puts it in an auto context.

Mayer alleges that The Minutemen and Mafia work together. No evidence cited.

Loran Hall was "involved". Hall may be a Minuteman. Thus, by Mayer, Hall must be Mafia!

The logic appears almost incoherent. But comparison, Garrison seems respectable.

The Book, in effect, defends The W.C., The CIA, etc.

I suppose given the author's premise, no other result could be anticipated.

What difference is there between Mayer and Belin? Damn little.
